

Rare Miracle Mineral Removes Deadly Toxins and Heavy Metals in Just 30 Seconds a Day

What if you could be free of debilitating fatigue, keep your heart in great shape, conquer cancer naturally, and clear away brain fog to experience renewed clarity and focus?

Imagine being able to sleep soundly at night, recall facts and figures easily from memory, and look years younger to boot.

If this sounds too good to be true because you've tried everything... think again. Because there is one natural mineral that can clear out the 'toxic garbage' that's been holding you back, so you can feel better than you have in years.

Now, you may not know it, but much of the disease, cancers and health problems we experience are rooted in toxicity. Mercury, arsenic, lead, cadmium, pesticides, and volatile organic compounds just scratch the surface of what our bodies have to fight against daily.

By some estimates, we are ***exposed to over 80,000 chemicals in our daily lives***, just from the food we eat, water we drink, and air we breathe. These toxins build up in our bodies affecting our sleep, memory, concentration, weight, and even inflammation ([1](#), [2](#), [3](#), [4](#)).

Modern medicine doesn't have the answer to this modern problem. But... nature does.

There is a rare natural mineral, created through a reaction of volcanic ash and seawater, that can eliminate dangerous toxins from the body, down to the cellular level.

Its negative-charge and honeycomb shape **acts as a natural chelator**, binding to positively-charged toxins and ushering them out of the body, quickly and effectively.

Zeolite Clinoptilolite: The Miracle Mineral for Detox

If you've heard of the zeolite Clinoptilolite, it's because this type of zeolite has been widely studied for its ability to:

- Flush heavy metals from the body, including toxic lead ([5](#))
- Provide alkalizing minerals to support a healthy pH
- Protect kidney function by detoxing heavy metals ([6](#))
- Strengthen the immune system through removing toxins ([7](#))
- Protect against leaky gut by strengthening the intestinal wall ([8](#))

- And much more, as extensive clinical research shows ([9](#))

The detoxification and health benefits of the zeolite Clinoptilolite are astounding. It's hundreds of times more effective than activated charcoal, a commonly known and used detoxifier that can detox the gut but comes with harsh side effects.

The **zeolite Clinoptilolite can bind to toxins throughout the whole body** and has an affinity for toxins only, so it never removes beneficial minerals, and there are no negative side effects.

Warning: Most Zeolite Products Do Not Work

The problem is, most zeolite products are not capable of cleansing at the cellular level. To go beyond the gut and reach into cells for a deep detox, the **zeolite must be nanosized**.

When the zeolite is nanosized and suspended in water molecule clusters, this natural detoxifier can travel throughout the body, even **past the blood-brain barrier**.

Imagine clearer thinking, ease in recalling tasks, improved mood and much more because your brain is now free of neurotoxic heavy metals!

But to take out heavy metals and other toxins, the zeolite must also be cleansed and pre-filled with alkalizing minerals. Why? The fact is, when mined, zeolite comes filled with environmental pollutants because that's what zeolites are good at in nature – absorbing toxins.

However, if a zeolite is already filled with toxins, it can't take any more from your body. That's why most zeolites sold today don't work, and why we haven't recommended one before.

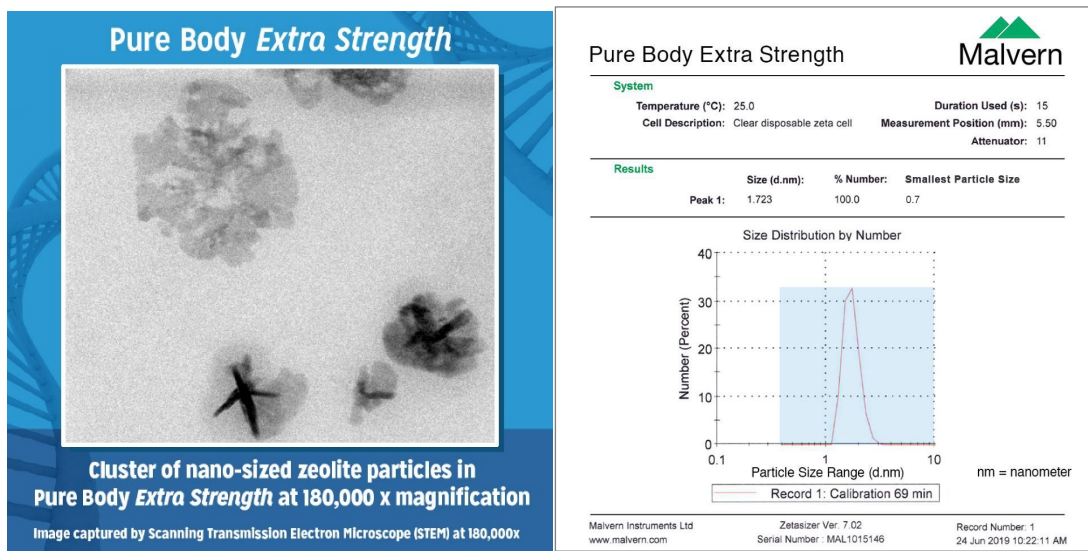

Until now...

The Most Effective Zeolite on the Market Backed by Science

After doing extensive research, we discovered Pure Body *Extra* by a company called Touchstone Essentials. Their cleansing process and nanosizing technology is hands-down the most advanced we've seen, yielding the only zeolite on the market that can effectively detoxify the entire body on a cellular level.

This zeolite uses nanosized Clinoptilolite to access toxins everywhere in the body. These particles are so small they are invisible to the naked eye and need to be magnified thousand-fold. And it's backed up by the gold standard in instrumentation – Malvern particle size testing.

This nanometer size means they can get to a cellular level, and it also means the collective surface area of the zeolite particles creates a vast filter that mops up toxins within hours.

And because these zeolite particles are encapsulated within water molecule clusters, it is delivered in a liquid spray that is easy to use (just a few sprays, morning, noon, and night) with no odor, no taste, and no hassle.

Pure Body *Extra* has also been cleansed of existing pollutants so that it more effectively removes heavy metals throughout your body. This is all proven with third-party independent clinical testing. Not only that, the zeolite particles are pre-filled with alkalizing minerals. That way, the zeolite “swaps” a beneficial mineral for a toxin every time.

In all our research, this zeolite product has the most rigorous research and testing.
