

We must secure our **CRITICAL INFRASTRUCTURE**
*It is our **Constitutional right that we be protected.***
This Civilian Electric Grid is not protected.
Congress and the White House are!

The grid could be taken down. Because of lobbying, insurance, greed, and the *power of the power companies to ignore problems like; Aliso Canyon, the Plains Oil Spill in Santa Barbara, and the San Bruno Gas Disaster we are at risk!* The fix is easy. It could bring jobs and create a economical protected and updated Energy Grid. I am dedicated to protect and harden the civilian Grid.

We need to lower taxes Strengthen the economy Create Jobs in SFV- Protect Social Security – Healthcare – Protect our Veterans - the Environment – Education Secure rights for women - Stop the Fed from printing us into debt devaluing our savings and causing inflation. Secure the Electric grid from terrorists.

PATREA PATRICK for Congress 30th District
*Documentary Filmmaker Critical Infrastructure Expert

SAN FERNANDO VALLEY ISSUES

Gas leak-Transportation-Jobs-Homeless-Schools -Taxes-Vets
We are in a time where the public wants transparency in government. Citizens have lost trust in politicians. This is an election year where *People want People* representing their communities, not career politicians indebted to Corporate interest. Our Constitution demands it.

This is not a time to be silent.

The country is in a uproar that politics is so corrupt spending the nation into debt; devaluing our savings and causing inflation! The number one thing people fear is that their politicians are lying to them! Is it any wonder when we have politicians looking the other way when corporations like So. Cal Gas do business as usual and children, families, businesses, and communities suffer. Not on my watch! I work here. I went to school here. I want better for the SFV.

Please watch the trailers of films I have produced to inform you at

I need your vote in this JUNE 7th primary.

Patrea Patrick

for Congress in the 30th District (D) CA

Stop the undue influence of money in politics!

With her background as an Expert on the National Grid on Critical Infrastructure and how it relates to our National Security, Patrea understands the new warfare that can bring down our critical infrastructure. CYBER warfare, Terrorists and EMP's. She has legislation to push in Congress, to protect the grid and Create jobs in the infrastructure in the U.S. She has been a strong advocate to stop GMO's and Agriculture's extended use of dangerous pesticides and weed killers polluting our food and to bring back farming as a matter of our nation's security reducing food dependence and the oil footprint. Her films point out big OIL and GAS, pollution, greed, and environmental catastrophes. Patrea has affordable Eco friendly ideas to take on the drought facing California that is a major threat to agriculture, industry and citizens.

Patrea's films expose the big banks bailouts, causing millions the loss of their homes and how the FED is printing us trillions into debt and the revolving door that goes from Wall Street to Washington. She's an activist voicing the profits mechanism of the Pharmaceutical industry that lobbys to keep its power and influence in Washington. She is a voice for Women's Advocacy, and works to increase women's representation. Please donate

*The Electric Grid is a disaster waiting to happen.
It will not be an accident.*

Weighing that we had the largest Gas Leak in history a disaster of this magnitude needs our full attention. Our communities are at full risk as well from a grid failure. 11 different Congressional studies show the grid can be taken down by solar and electro magnetic disturbance, Cyber attack - Hackers -ISIS – and Terrorists. The Smart Grid has connected the grid like dominoes and can be taken out all at once. Destroy the transformers and the grid is not operating. We are at risk of a long term wide spread black out.

**no FOOD no WATER no COMMUNICATIONS
Hospitals, Police Fire Dept all shut down!**
